| Truck Space CM / CF | 0.01 / 1 |
| Labor to Assemble | None Required |

Benefits (Smartness of it all) Why we are better!

Smartstage turntables are built,

- Low profile, very thin
- High load capacity
- Remote control (not all models)
- Quiet smooth operation
- Variable speeds and reverse (not all)
- Simple to set up, just minutes, no tools
- Most sizes stock, immediate shipping
- Ergonomically friendly,
- Compact and attractive
- Years of proven tested durability

How it works

Just plug it in, and switch on.

Each revolving stage comes with a side control built in. Some turntables also have a wireless remote control, which controls speed and direction.

What sizes and models do we make?

Smartstage makes turntables for sale from 8 inches to 100 feet, for revolving displays and shows for churches, trade fairs and live shows. Place people or products on your display turntable.

Engineering and testing

Smartstage turning rotary stage displays have been road tested under the demand of rock tours, and trade shows. Our team of engineers are constantly striving to streamline, add features, make thinner and better.

Service & Warranty

Smartstage provides a one-year warranty for the entire system. Feel free to email our home office service department for inquiries on your new system.
